Preparations

For Equinor users

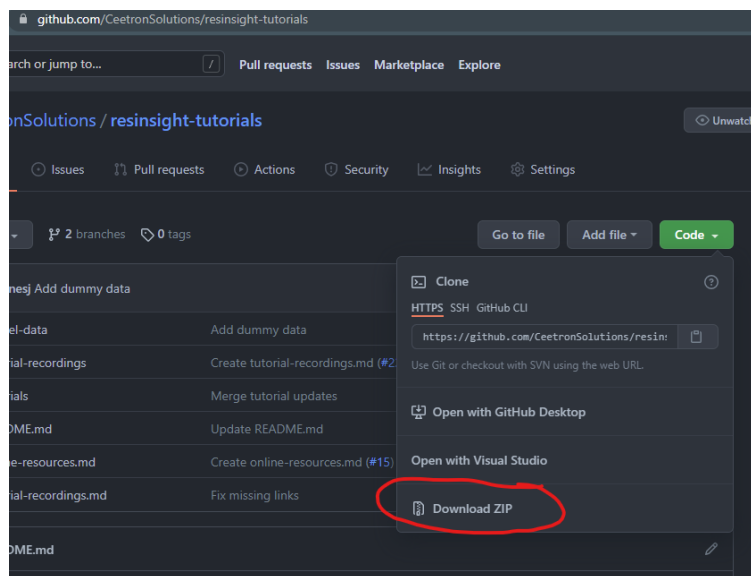

Test models used in tutorials are available at the folder “/project/res/share/riUserCourse/2020_intro/model-data”

You can either use this location or download the tutorial data as described below.

Online tutorials

Test models used in tutorials are available from <https://github.com/CeetronSolutions/resinsight-tutorials>

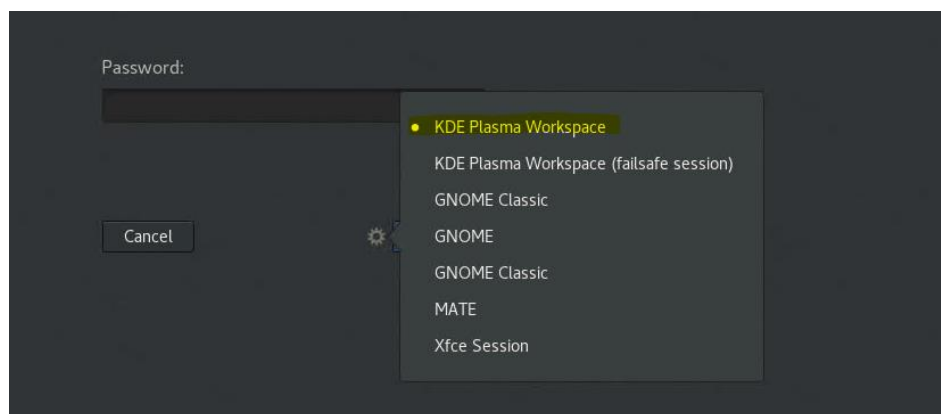

Either clone the GitHub repository, or select “**Download ZIP**” from the **Code** menu

Log in to RGS node

Use <https://rgs.statoil.no/main.cgi>

Optional step: Select KDE desktop to improve the user interface experience on some systems.

Start the ResInsight application

In a command shell, type the following text and press **Enter**

```
resinsight
```
